

I subscribe to XM satellite radio and profit by XM instant weather and traffic reports. I can decide what routes to take to miss bad weather and traffic mishaps. I respectfully urge the FCC to reject NAB petition 04-160. I stopped listening to the nasty foulmouthed trash on fm radio. I think fm radio is the downfall of the last two generations of children. I think fcc should clean up this mess before trying to stop a good clean service. I suggest you go to any market and listen to trash you have to put up with to get weather or traffic. I can listen to clean wholesome programming on one channel anywhere in country. thanks
